WORK EXPERIENCE

Nortform Studio - United States

Website: <https://nortform.com>

Lead Developer

[3 Feb 2025 - Current]

- Led the design and development of 15+ mobile and web products across healthcare, caregiving, document management, and resource navigation sectors.
- Built applications integrating authentication, mapping services, subscription billing, push notifications, and cloud-based backend services.
- Delivered cross-platform solutions using React Native and Expo, reducing the need for separate iOS and Android codebases.
- Integrate third-party services, including authentication, subscription billing, mapping services, and cloud-based backends.
- Manage deployment workflows, testing processes, and application optimisation.

The Pocono Business News - United States, Pennsylvania

Business or sector Information and communication | **Department:** Media | **Website:** pbnews1.com

Web developer

[6 Jan 2020 - 17 Jan 2025]

- Built, Maintain and optimise a news platform serving thousands of local monthly readers.
- Manage website infrastructure, including hosting, DNS, SSL certificates, backups, and performance monitoring.
- Implement SEO and performance improvements that contributed to faster page load times and improved search visibility.
- Support editorial teams in publishing and maintaining high-volume digital content.

MS Alheri BDC - Nigeria, Lagos

Business or sector Financial and insurance activities

IT Support

[1 Nov 2016 - 30 Dec 2019]

- Delivered first-line support for hardware, software, and network-related issues across business operations.
- Installed, configured, and maintained systems, user accounts, and network infrastructure, ensuring smooth operations and reducing downtime by 30%.
- Created technical documentation and troubleshooting procedures to improve support efficiency.

FutureCom Technology Limited - Nigeria, Lagos

Business or sector Information and communication | **Department:** Telecom | **Website:**

<https://futurecomng.com>

Network Administrator

[23 Mar 2014 - 9 Sep 2016]

- Assisted with network administration and troubleshooting activities.
- Supported LAN/WAN deployments and infrastructure maintenance.
- Configured network devices and monitored connectivity performance.
- Participated in system upgrades and infrastructure projects.

PROJECTS

Nuvilo - Healthcare Discovery Platform A healthcare resource platform designed to help users discover hospitals, clinics, healthcare providers, and healthcare services.

Key Contributions:

- Built a cross-platform mobile application using React Native and Expo.
- Integrated location-based services and healthcare resource discovery features.
- Developed authentication and user management workflows.
- Designed scalable architecture for future expansion and service integrations.

Link: <https://nuvilo.cloud>

KinPulse - Family Care Management Platform A family-focused care management application designed to help users support parents and loved ones.

Key Contributions:

- Developed mobile application architecture and user experience flows.
- Built notification systems and user engagement features.
- Integrated secure authentication and cloud-based data management.
